WORK EXPERIENCE

Amazon

Jun 2023 – Aug 2023

Software Developer - Intern

Toronto, Ontario

- Designed and implemented a precompute layer to increase recommendation speed by **99%** from 150ms
- Created automated data analysis tool to ensure predictions are above **75%** accuracy

PAIR Lab (Robotics)

Sep 2021 – Present

Researcher

Toronto, Ontario

- Exploring the usage of **MPC**, **MultiModal LLM** in long-term planning of low level task through constant re-evaluation of plans, improving on state of the art: [arXiv:2401.04157](https://arxiv.org/abs/2401.04157)
- Worked on meta-controllers to assist **multi-policy** agents to plan long horizon tasks using **sparse rewards**
- Assisted with **Orbit**, a robot learning framework built on top of **NVIDIA's Isaacsim** resulting in a publication
- Designed and built **GPU** parallelized state systems with low overhead allowing a **4x** speedup over the cpu solution

Amazon

May 2022 – Aug 2022

Software Developer - Intern

Vancouver, British Columbia

- Engineered a modular microservice in **Java** to send notifications to customer of cashback on select products
- Utilize **AWS** webservices such as **Lambda**, **SQS** and **SNS** to ensure scalability of the notification system

Intel

May 2021 – May 2022

Software Engineer - Intern

Toronto, Ontario

- Developed support software to generate 4000+ of completely random test-cases for edge-case testing
- Optimized support tool's Ram templates to reduce false positives and failing cases by around **70%**

Centivizer

Apr 2020 - Sep 2020

Software Developer - Part-time

Toronto, Ontario

- Designed and wrote backend application using **Node.JS** and **SimplePeer** to connect users via video call

EDUCATION

University of Toronto

— cGPA

MSc in Applied Computing

Sept 2023 - Dec 2024

University of Toronto

3.84 cGPA

HBSc Computer Science Specialist, Major in Mathematics

Sep. 2018 – May 2023

PUBLICATIONS (* EQUAL CONTRIBUTION)

M. Skreta*, Z. Zhou*, **J. L. Yuan***, K. Darvish, A. Aspuru-Guzik, A. Garg. RePLan: Robotic Replanning with Perception and Language Models, *Submitted to (ICLR) 2024 [under review]*

M. Mittal, C. Yu, Q. Yu, J. Liu, N. Rudin, D. Hoeller, **J. L. Yuan**, R. Singh, Y. Guo, H. Mazhar, A. U. Mandlekar, B. Babich, G. State, M. Hutter, A. Garg. ORBIT: A Unified Simulation Framework for Interactive Robot Learning Environments, *(RA-L) 2023*

PROJECTS

MultiModal AI Story teller (Co-Founder) | private repo

Jul 2023 – Present

- Implemented **Multimodality** using **LLMs** and **Latent Diffusion Models** to build a interactive story teller.
- Lead efforts to increase **LLM** efficiency by utilizing SOTA quantization to decrease VRAM usage by 87.5%.
- Utilized NLP techniques to summarize context to reduce context size, reducing inference time by up to 10%.
- Grew project from 0 to 50 daily active users resulting in 2k in profits.

CaNetDa: Deep Learning for GeoGuesser in Canada | Link: GitHub

Jan 2021 – Apr 2021

- Mined dataset and trained an ensemble of **Computer Vision** models: **ResNet**, **EfficientNet** and **Vision Transformer** resulting in a **47%** improvment over random agent in predicting province of image in Canada

Machine Learning Course Competition | Link: GitHub

Sep 2020 – Dec 2020

- Achieved the 5th highest score in the unsupervised movie recommendation competition based on Netflix data

Tron UDP Multiplayer | Link: GitHub

Sep 2019 – Dec 2019

- Created a four player game for local networks using the **UDP** network protocol and C++
- Utilize **epoll** for both client and server to monitor the socket as well as the timer (server) and stdin (client)

BF-Interpreter | Link: GitHub

Mar 2018 – Nov 2018

- Built a BF shell that runs all example BF programs found on [Wikipedia](https://en.wikipedia.org/wiki/Brainfuck) in C

TECHNICAL SKILLS

Tech: Deep Neural Networks, Large Language Models, Latent Diffusion Models, Python, C++, JavaScript, Java, Rust

Tools: Huggingface, Oobabooga, PyTorch, Git, React, Node.js, MongoDB, SQL, Numpy, GraphQL, Robotics,
