## WORK EXPERIENCE

<b>Amazon</b> <i>Software Developer - Intern</i> <ul style="list-style-type: none"><li>In progress</li></ul>	Jun 2023 – Aug 2023 Toronto, Ontario
<b>PAIR Lab</b> <i>Researcher</i> <ul style="list-style-type: none"><li>Built on top of <b>NVIDIA</b>'s Isaacsim to create a robot reinforcement learning <b>framework</b></li><li>Utilized state-of-the-art SEA algorithm to solve <b>long-horizon robotics tasks</b></li><li>Creating robot learning environments and using PPO to create <b>reinforcement learning</b> benchmarks</li></ul>	Sep 2021 – Present Toronto, Ontario
<b>Amazon</b> <i>Software Developer - Intern</i> <ul style="list-style-type: none"><li>Engineered a modular microservice in <b>Java</b> to send notifications to customer of cashback on select products</li><li>Utilize <b>AWS</b> webservices such as <b>Lambda</b>, <b>SQS</b> and <b>SNS</b> to ensure scalability of the notification system</li></ul>	May 2022 – Aug 2022 Vancouver, British Columbia
<b>Intel</b> <i>Software Engineer - Intern</i> <ul style="list-style-type: none"><li>Developed support software to generate 4000+ of completely random test-cases for edge-case testing</li><li>Optimized support tool's Ram templates to reduce false positives and failing cases by around <b>70%</b></li></ul>	May 2021 – May 2022 Toronto, Ontario
<b>Centivizer</b> <i>Software Developer - Part-time</i> <ul style="list-style-type: none"><li>Designed and wrote backend application using <b>Node.JS</b> and <b>SimplePeer</b> to connect users via video call</li></ul>	Apr 2020 - Sep 2020 Toronto, Ontario

## EDUCATION

<b>University of Toronto</b> <i>MScAC</i>	— cGPA Sept 2023 - Jan 2025
<b>University of Toronto</b> <i>HBSc Computer Science Specialist, Major in Mathematics</i>	3.84 cGPA Sep. 2018 – May 2023

## PUBLICATIONS

<b>J. L. Yuan</b> , Z. Zhou, K. Darvish, X. Zhou, A. Mandlekar, A. Garg. Multi-Stage Structured Task Learning Using Semantics with SEA-RL, ( <i>under review</i> )
M. Mittal, C. Yu, Q. Yu, J. Liu, N. Rudin, D. Hoeller, <b>J. L. Yuan</b> , R. Singh, Y. Guo, H. Mazhar, A. U. Mandlekar, B. Babich, G. State, M. Hutter, A. Garg. ORBIT: A Unified Simulation Framework for Interactive Robot Learning Environments, <i>IEEE Robotics and Automation Letters (RA-L)</i> 2023

## PROJECTS

<b>Deep QLearning Snake</b>   Link: GitHub <ul style="list-style-type: none"><li>Utilized <b>PyTorch</b> to write a Deep Q-Learning snake agent reaching a high score of <b>40</b> after <b>5</b> minutes of training</li></ul>	May 2021 – Dec 2021
<b>CaNetDa: Deep Learning for GeoGuesser in Canada</b>   Link: GitHub <ul style="list-style-type: none"><li>Mined dataset and trained an ensemble of <b>ResNet</b>, <b>EfficientNet</b> and <b>Vision Transformer</b>.</li><li>With our approach, a accuracy of <b>60%</b> was consistently achieved out of 13 options</li></ul>	Jan 2021 – Apr 2021
<b>Machine Learning Course Competition</b>   Link: GitHub <ul style="list-style-type: none"><li>Achieved the 5th highest score in the unsupervised movie recommendation competition.</li><li>Improved on the SGD training process by adding weight regularization and biases based on reseach papers</li></ul>	Sep 2020 – Dec 2020
<b>Tron UDP Multiplayer</b>   Link: GitHub <ul style="list-style-type: none"><li>Created a four player game for local networks using the <b>UDP</b> network protocol and C++</li><li>Utilize <b>epoll</b> for both client and server to monitor the socket as well as the timer (server) and stdin (client)</li></ul>	Sep 2019 – Dec 2019
<b>BF-Interpreter</b>   Link: GitHub <ul style="list-style-type: none"><li>Built <b>interpreter</b> that runs BF in C</li><li>Includes a BF shell and runs all example BF programs found on <u>Wikipedia</u></li></ul>	Mar 2018 – Nov 2018

## TECHNICAL SKILLS

**Languages:** Python, C/C++, JavaScript, Java, C#  
**Tools:** Git, React Native, Node.js, MongoDB, SQL (Postgres), PyTorch, Numpy, GDB, GraphQL
